Belkacem Mehdi

Software Engineer | Full Stack Development & AI Systems

xlutirax@gmail.com | 0541789699 | 01 rue abdelkrim ouahli 16000 Algérie | Algeria

PROFILE

Passionate Software Engineer specializing in the technical delivery of intelligent systems. Experienced in building scalable web applications and integrating custom AI orchestration (RAG pipelines). Strong background in full-stack engineering, containerized architectures, and secure infrastructure, eager to turn complex AI capabilities into reliable business solutions.

TRAINING

Master's Degree in Software Engineering
CESI Exia
- **Core Focus:** Advanced engineering training centered on designing complex software architectures, IT system urbanization, and technical project management.
- **Languages:** TOEIC Level B2 (Professional English) — 02/2025 | TCF Level C1 (Advanced French)

PROFESSIONAL EXPERIENCE

Web Development Intern | Algérie Télécom 03/2023 – 06/2023
Algiers, Algeria
- Built a custom HR web application *(insert tech used, e.g., using PHP/PostgreSQL or React)* from the ground up to streamline the workflow and relationship management between supervisors and trainees.

Full Stack Software Engineer Intern | Ooredoo 01/2024 – 04/2024
Algiers, Algeria
- Designed and developed a real-time web dashboard *(insert tech used, e.g., using React and Node.js)* enabling supervisors to track progress and optimize task organization.
- Modernized the internal system architecture to significantly enhance performance, scalability, and user experience.

Full Stack Engineer & Infrastructure Architecture Intern | Ooredoo 09/2024 – 02/2025
Algiers, Algeria
- Engineered a centralized Knowledge Base & Project Management Platform for team collaboration.
- Designed the full-stack architecture and deployed a secure, containerized environment utilizing **Docker, Nginx**, and **Linux VMs**.

AI Systems Engineer & Software Architecture Intern | Bank CNEP 02/2026 – 07/2026
Algiers, Algeria
- Architected an on-premise Intelligent Banking Assistant (RAG Platform) to guarantee full data sovereignty.
- Built a semantic search pipeline using **ChromaDB** for vector embeddings, re-ranking models, and a local **LLM** for context-aware regulatory answers.
- Implemented query expansion, intent routing, and GPU-accelerated inference via **FastAPI** to minimize latency and token usage.

SKILLS

Languages & Frameworks
- JavaScript, React, Next.js, Node.js, Python, C/Arduino, HTML5, CSS3

Devops & Security
- Docker, Nginx, Virtualization (VMs), Git/GitHub, Linux (Ubuntu/Debian)

Soft Skills
- Autonomy, Problem-solving, Cross-functional communication, Strategic thinking

Databases & AI Data
- PostgreSQL, MongoDB, ChromaDB, Vector embeddings

Project management
- ML, WBS, SWOT, AMDEC, Technical documentation, Agile Delivery

AREAS OF INTEREST

Innovation & Prototyping — Passionate about transforming concepts into functional apps (e.g., culinary management, outdoor/hiking tracking). | **Game Development** — Building interactive experiences using Unreal Engine. | **Martial Arts** — Kick-boxing (focus on discipline and perseverance). | **Culture** — Deep interest in Japanese culture.
